

# Download Aircraft Engines And Gas Turbines

Airbreathing jet engines are gas turbines optimized to produce thrust from the exhaust gases, or from ducted fans connected to the gas turbines. Jet engines that produce thrust from the direct impulse of exhaust gases are often called turbojets, whereas those that generate thrust with the addition of a ducted fan are often called turbofans or ...Gas Turbines International specializes in the purchasing and sales of gas turbine engines and engine parts used in both, industrial power plants and in commercial aviation and aircraft. Woodward equips the most complex aircraft propulsion systems in the world with complete engine fuel delivery and combustion control solutions, and proven fuel control and fuel injection components. Learn about Woodward's Integrated system and component solutions that improve the emissions, efficiency, reliability and performance of industrial diesel and gas engines.
