

# Download Analyzing Safety Performance

Behavior Based Safety (with HOP) (Behavioral Safety, Behavioral Based Safety, BBS) What is behavior based safety? Behavior based safety (a.k.a. an observation and feedback process) provides visibility and control over a key upstream indicator of safety performance -- safe and at-risk behaviors. In the previous post in this series, I provided some T-SQL scripts that can check key settings and highlight possible issues you need to address. This post aims to provide some feedback and suggestions on the information the scripts collect. There are of course different views on almost all SQL Server configuration settings, but the ...Enhancing health & safety culture & performance. Your workplace's health and safety culture, proactive management of health and safety, and health and safety performance are interlinked. DETA is a P&WC Designated Analysis Center (DAC) Performing Engine Condition Trend Monitoring on P&WC turboprop and fan engines. ECTM is recognized by operators world wide as an effective maintenance tool for early problem detection and engine performance monitoring.
