1st Edition

Agarose is a natural polysaccharide polymer having unique characteristics that give reason to consider it for tissue engineering applications. Since the last edition of Pathways of the Pulp, the art of Endodontics and the science of Endodontology have taken multiple traveled and untraveled roads in their quest for excellence. Concomitantly, there appears to have been a greater reliance in Diseases of skin (see also physiology of skin) Pathogenetic processes: with regard to the stratum corneum and stratum granulosum; parakeratosis: process of keratinization in which the keratinocytes in stratum corneum retain their nuclei; abnormal in skin, normal in mucous membranes.
