Research Highlight Dynamical Seasonal Prediction of Tropical Cyclone Activity: Robust Assessment of Prediction Skill and Predictability May 17, 2019 - Dynamical seasonal prediction systems have recently shown great promises in predicting tropical cyclone activity. In physics and engineering, fluid dynamics is a subdiscipline of fluid mechanics that describes the flow of fluids—liquids and gases. It has several subdisciplines, including aerodynamics (the study of air and other gases in motion) and hydrodynamics (the study of liquids in motion). Geophysics / dʒiˈɒfɪzɪks / is a subject of natural science concerned with the physical processes and physical properties of the Earth and its surrounding space environment, and the use of quantitative methods for their analysis. Sessions/Tracks. Sessions/Tracks. Conference Series llc LTD cordially invites you to attend the 4th International Conference on Fluid Dynamics & Aerodynamics, scheduled during November 11-12, 2019 in Madrid, Spain.
