

Download How Did We Find Out About The Universe

This is a fairly standard treatment of how we went from the idea that the universe was a hollow sphere dominated by the Earth to the big bang. (Actually, it starts with Galileo, so we skip the hollow sphere bit.) Anyway, it's material covered so thoroughly elsewhere by Asimov for adults that there's little interest at that end, but it ...We still don't know why or how the universe is accelerating, but the leading theory is that there's some kind of energy—scientists call it 'dark energy'—pushing everything apart. Perhaps some ...Find out why Close. How Do We Know the Age of the Universe? SciShow Space. Loading... Unsubscribe from SciShow Space? Cancel Unsubscribe. Working...
