

Download Neurological Infections

A neurological disorder is any disorder of the nervous system. Structural, biochemical or electrical abnormalities in the brain, spinal cord or other nerves can result in a range of symptoms. Spinal infections can be classified by the anatomical location involved: the vertebral column, intervertebral disc space, the spinal canal and adjacent soft tissues. Neurological Problem Symptoms, Causes and Effects. According to the University of California, San Francisco, there are more than 600 neurological disorders. What Does a Neurological Evaluation Usually Entail? An evaluation of the nervous system for nervous system diseases can include three general components, a subjective review of the patient's presenting complaints and medical history, a neurological exam and diagnostic testing focused on the nervous system.
