

Download Social Science Research And Climate Change An Interdisciplinary Appraisal

IMBeR and the East China Normal University (ECNU) jointly established a regional office, the IMBeR Regional Project Office (IMBeR RPO), to promote IMBeR in the Asia-Pacific region and support the implementation of the IMBeR Science Plan. Sociology is the study of society, patterns of social relationships, social interaction, and culture of everyday life. It is a social science that uses various methods of empirical investigation and critical analysis to develop a body of knowledge about social order, acceptance, and change or social evolution. 1. Introduction. Social–ecological systems currently face multiple unprecedented challenges including, but not limited to, the degradation of ecosystems, over exploitation of natural resources, climate change, wealth inequalities, and human conflicts. Interdisciplinarity or interdisciplinary studies involves the combining of two or more academic disciplines into one activity (e.g., a research project). It draws knowledge from several other fields like sociology, anthropology, psychology, economics etc.
